

 INSTRUCTION

## How to measure your individual bracelet size

If you are not able to print this document to scale, you can use a shoelace, a piece of fabric or a strip of paper instead, mark it where it overlaps and then measure from starting point to end mark with a ruler.

- 1.** Please print the document on DIN A4 paper format (210 x 297mm). Ensure that the document is not scaled (printed in the actual size with a scaling of 100%).

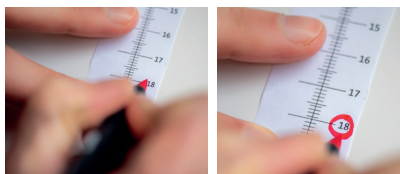

- 2.** Cut out the ruler on the left side along the cutting outlines

- 3.** Place the top of the measuring tape on your wrist, then wrap the tape around your wrist to determine how tight the bracelet should be.

- 4.** When the measuring tape is in the correct position, mark or take note of the part where it overlaps. This should be your perfect bracelet size.

- 5.** Please provide us the determined size in centimeters.
